LinkedIn: <https://www.linkedin.com/in/itsnidhikumari>

Summary

- Software Engineer with 5 years of experience building scalable applications in the banking and finance sector.
- Demonstrated expertise in Software Development Lifecycle, Object Oriented Programming, System Design, Design Patterns, Software Engineering principles and Agile methodologies.
- Proficient in implementing microservices architecture, RESTful APIs, distributed systems, Test-Driven Development, CI/CD pipelines using Jenkins, and skilled in database development.
- Actively upskilling with a strong interest in emerging technologies and languages like React, Angular, etc.

Education

University of Cincinnati, OH, USA	Jan 2024-May 2025
Master of Science, Information Technology	Major GPA: 4.0
Biju Patnaik University of Technology	Jun 2013-May 2017
Bachelor of Technology, Information Technology	Major GPA: 3.67

Skills: Java, Multithreading, Spring Boot, Hibernate, Microservices, Kafka, MongoDB, MySQL, Oracle, REST APIs, HTML, CSS, JS, JSON, XML.

Tools and Platforms: AWS (ECS, S3, Lambda), Jenkins, Docker, Kubernetes, Git, Jira, Confluence, Perforce, JUnit, Mockito, Linux, Unix.

Relevant Coursework: Data Structures, Algorithms, Machine Learning, Python, React, JavaScript, Cloud (AWS, GCP).

Professional Experience

Nagarro, KA, India	Oct 2025-Present
Associate Staff Engineer	
• Worked as a Java Backend Developer delivering scalable, enterprise-grade solutions for BFSI clients. • Designed and developed high-performance RESTful APIs using Java and Spring Boot, supporting critical business workflows and improving system scalability. • Built and enhanced microservices-based components, ensuring loose coupling, fault tolerance, and high availability. • Collaborated with global cross-functional teams in Agile environments to deliver high-quality features within sprint timelines.	
Proximate Technologies, OH, USA	Jul 2025- Aug 2025
Software Developer Intern - Training	
• Gained hand-on experience in java programming, spring boot, and hibernate for database connectivity. • Implemented small scale projects to strengthen knowledge of OOP, collections, and exception handling. • Learned to design and test RESTful web services using spring boot. Practiced writing Junit tests to improve code quality. • Collaborated in team activities, using git/GitHub for version control and code sharing.	
Master of Science, University of Cincinnati, USA	Jan 2024-May 2025
• Pursued MS degree in Information Technology, coursework included -Machine Learning, React, React Native, projects, and research. • Completed core coursework, capstone project, and research. • Developed a fashion recommendation system using EfficientNet-B0 and TensorFlow, achieving 89.86% accuracy on a dataset of over 44,000 images. Applied image classification and data preprocessing techniques. • Created a jaywalker detection system using VGG16 and TensorFlow, trained on 691 images and achieved 49% accuracy. Implemented computer vision features using Python.	
MS Admission Prep, USA	Feb 2023-Dec 2023
• Dedicated time to exam preparation, application process, and securing university admission. • Prepared for entrance exams (GRE/TOEFL), researched universities, wrote SOPs, managed applications.	
Accolite Digital, KA, India	Jan 2023-Jan 2023
Senior Software Engineer	
• Developed and optimized Rest APIs. • Conducted technical interviews for potential hires.	
Capco, KA, India	Sep 2021-Dec 2022
Senior Software Engineer	

- Designed and developed high-performance PDF generation APIs leveraging RESTful services, JDBC, and proprietary tools, automating report creation for client accounts and generating 10,000+ PDFs/month with minimal latency.
- Built and deployed 12+ RESTful CRUD APIs for new business features, empowering 5,000+ users to efficiently manage investment and market data across multiple systems.
- Integrated proprietary market data APIs to implement Overruling/Underruling logic, improving portfolio accuracy and enabling a 30% increase in investment analysis precision.
- Implemented unit and integration testing using JUnit and Mockito, achieving > 90% code coverage, reducing defects pre-production by 40% and strengthening the overall system reliability.
- Collaborated with global cross-functional teams to deliver Agile sprint deliverables on time and supported production deployments ensuring business continuity and regulatory compliance.
- Contributed to API documentation, code reviews, and design discussions, ensuring adherence to architectural standards and performance benchmarks.

Investnet Yodlee, KA, India

Sep 2019-Sep 2021

Software Engineer

- Developed and optimized RESTful APIs using Java, Spring Boot, and Hibernate (JPA) to process large-scale financial data, boosting system throughput by 30%.
- Enhanced multi-account transaction aggregation with AJAX and optimized SQL queries, improving data accuracy and processing time by 15%.
- Refactored legacy code and resolved high-priority production bugs, reducing API latency by 25% and system issues by 35%.
- Maintained strong data consistency using ACID-compliant SQL databases and contributed to ongoing feature enhancements in collaboration with cross-functional teams.
- Partnered with product owners and QA engineers in Agile sprints to deliver new feature enhancements and critical bug fixes, reducing system issues by 35%.
- Mentored junior developers, conducted knowledge-sharing sessions, and created architectural and onboarding documentation, achieving 100% onboarding success rate for new hires.

Associate Software Engineer

Sep 2018-Sep 2019

- Designed and implemented a unified login system using multithreading and the singleton design pattern, improving authentication time by 40% and reducing infrastructure cost through optimized thread utilization.
- Integrated SMS-based multi-factor authentication (MFA) to strengthen application security, reducing unauthorized access by 30%.
- Developed scalable, reusable screen-scrapers and data ingestion APIs to support millions of financial users, significantly enhancing data availability and business intelligence.
- Supported cross-functional collaboration across QA and DevOps teams to ensure seamless integration and deployment of backend services.
